

JOB PLACEMENT SUPPORT

When participants are ready to launch into the wild world of remote job seeking...a trained team will be by their side!

Many have tried to maneuver the online remote work search and gotten overwhelmed and lost, not knowing which path to take, which jobs are for real, or how to effectively apply for them once they are found. With Rural & Remote, we cut out a lot of the guesswork and share tips and strategies.

An important thing to remember during this phase: each PARTICIPANT will need to put forth the effort moving forward in THEIR job search. It has been proven that the more active they are with implementing what they have learned through our program, the more successful they will be! The energy and attention from our team will match what they are willing to put forth - we are here, put us to work!

CAREER PATH PLANNING

The journey with Rural & Remote continues after completion of the courses with a personalized, one to one planning meeting with the Program Coordinator.

During this meeting, it is decided together the best jobs to pursue and the best way to achieve that dream remote job! The Coordinator will provide a free membership to FlexJobs, our national partner and best vetted job board available. Professional guidance is offered on things like resume review, how to write a cover letter that gets you noticed, and establishing an aggressive LinkedIn strategy that leads to valuable connections.

VIRTUAL SUCCESS GROUP

Stay connected after completing the training with our Virtual Success Group, a continued learning opportunity to network with other participants, build on skills, additional training, etc. This group meets virtually on a regular basis.

This casual, online meet-up is facilitated by the Program Coordinator, and may include guest speakers such as current remote workers, successful program participants, employers that are hiring, or other industry professionals. If you are serious about finding a job working remotely...adding these sessions to your calendar twice a month is a must!
