

rural & remote

Stay Home. Come Home.

Phase 1

Do what you love. Where you love.

Rural & Remote is an effort to empower people in rural communities in the Great Plains to gain the necessary skills and experience to pursue remote work. We believe you shouldn't have to leave your community to achieve your goals. We are making economic opportunity a reality in rural communities.

The Rural & Remote process is customized for each individual based on their experience and unique needs. The process below outlines the core components of our process to help people prepare for remote work.

There are three main types of jobs that we help people prepare for and pursue.

Technical

Software or web development jobs involving computer programming skills

Professional

Marketing, sales, finance, education, medicine and high level customer service

Support

Executive assistant, admin support, data entry, customer service

Please check out [flexjobs.com](https://www.flexjobs.com) for great examples of remote jobs that are available.

PROGRAM OVERVIEW

1

Application

The application allows the Rural & Remote team to identify someone's remote job readiness and gives us the necessary information we need in order to start the job placement support process.

2

Rural & Remote Internal Review

Once an application is received the Rural & Remote team reviews the application and determines at what stage in our process the applicant should start.

3

Training

Depending on the interests, skills, and experience of the applicant, there are two types of training courses that we have at present. The Coding Academy trains and equips people to become Junior Full-Stack Developers. The Remote Work Certificate is a 30 day course that equips people with the necessary skills to be an effective remote employee.

4

Work Experience

One of the many things critical to being an effective remote employee is experience working remotely. Very few employers hire remote employees that do not have remote work experience. Through our intern and apprentice program we help people gain necessary important remote work experience. These are paid positions working remotely for different Community Partners.

5

Job Placement Support

When an individual is ready to pursue a remote job, the Rural & Remote team helps support them in the process. We help provide job availability research, resume coaching, and support throughout the job application process.
